

AccÃ©s administraciÃ³ WordPress

Description

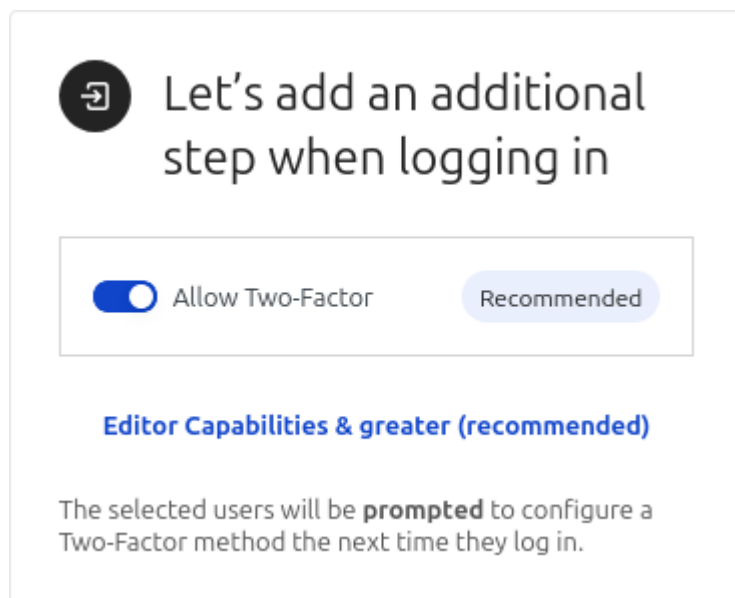

Per protegir lâ??accÃ©s administratiu del portafolis sâ??ha utilitzat un model de permisos basat en **rols**. El compte que administra el lloc disposa dels permisos necessaris per gestionar les pÃ gines, plugins, tema i configuraciÃ³ del WordPress. Els usuaris que no necessiten funcions administratives no haurien de disposar del rol dâ??administrador.

Aquesta separaciÃ³ de permisos permet limitar lâ??accÃ©s a les funcions mÃ©s importants i reduir possibles riscos de seguretat. WordPress permet assignar diferents rols segons les tasques que ha de realitzar cada usuari.

TambÃ© sâ??ha configurat la **dobles autenticaciÃ³**, que afegeix una segona comprovaciÃ³ a mÃ©s de la contrasenya. Ãs important en un lloc publicat a Internet perquÃ¨, encara que una contrasenya es veia compromesa, caldria superar una segona verificaciÃ³ per accedir al compte administratiu.

ConfiguraciÃ³ del compte i rol dâ??administraciÃ³ de WordPress.

Choosing who you are setting the site up for will help to preconfigure some settings for you.

If you are setting up Kadence Security for a client, next you'll select which users are theirs. Identifying your clients allows you to control their access to things like the security settings or if they are allowed to view the Security Dashboard.

Kadence Security Basic

Great Work! Thanks to Kadence Security Basic, your site is secure and ready for your users.

Use your security dashboard for insights into your users' activity and potential threats to your site. From there you'll be guided to actions you can take.

Here are some notable improvements...

- User security strengthened
- Brute force attacks blocked
- Banning bad bots and user agents

[Dashboard](#)[Settings](#)

Authorized IPs

☒ Automatically Temporarily Authorize IPs

Whenever an administrator user accesses the website, Kadence Security will prevent their last used IP from being locked out for 24 hours.

AUTHORIZED IPS

Enter a list of IP addresses that should not be locked out by Kadence Security.

Authorize my IP address

Configuració personalitzada de la doble autenticació perquè aquesta doble autenticació no s'apliqui al meu propi compte.
